

Throughout the whole writing process of this essay, we used ChatGPT as a source of inspiration, and also, as a tool for rephrasing certain phrases or enumerations in order (e.g. becoming repetitive in style and lacking the emotional depth, nuance, and context that define true artistic expression) to improve the quality of our writing, specifically in terms of grammar and fluency. It wasn't used to literally write the article or generate content, but rather to enhance our content and to highlight the key points. The role of ChatGPT was to produce some initial key points and give us an insight of how we should approach this, which helped shape the overall narrative. It is important to mention that the arguments that we stated and the examples included were our own work, as well as the images, quotes and parallels we made to put things into context.
